

# Search Techniques

## Method 1: Enter a question

Enter your question:

What is X select

- What is included in the 2m extension pack?
- What is the cut off time for the next working day delivery?
- What is the difference between the eDIY, MDIY and SUPER DIY towers?
- What is the difference between working height, tower height and platform height?**
- What is the size/weight of the tower?
- What is your VAT Number and Company Registration Number?

+ **What is included in the 2m extension pack?**

And select one question from the drop down box.

Enter your question: result

What is the difference between working height, tower height and platform height? X

Expand All

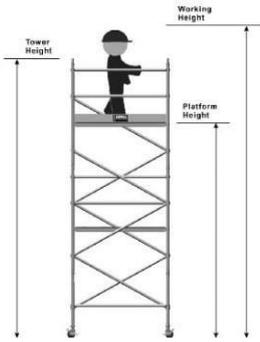

**What is the difference between working height, tower height and platform height?**

This needs to be answered in reverse. Platform height is how far you are standing off the floor, that is, distance between the ground and the upper platform board.

This needs to be answered in reverse. Platform height is how far you are standing off the floor, that is, distance between the ground and the upper platform board.

Tower height is the physical height of the tower itself, that is, distance between the ground and the top rail. The working height is how high you can reach when you are standing on the platform. It is a common practice that working height is platform height plus 2 metres.

Please see Height Specification for a handy diagram below.

The diagram shows a vertical tower with a platform. A person is standing on the platform. Three vertical dimension lines are shown: 'Tower Height' from the ground to the top rail, 'Working Height' from the ground to the top rail (including the platform), and 'Platform Height' from the ground to the top of the platform.

As the system will search all FAQ questions and answers for matches of all the words you typed. Search result will not be displayed for any unmatched keywords.

## Method 2: Enter keywords – enter some important keywords

working height X **select a question**

- Can I build a tower higher than 7M (working height)?
- Is 9.65m the maximum working height for Trade King 730 Tower?**
- What is the difference between working height, tower height and platform height?
- Can I build a tower higher than 7M (working height)?

Click to select a question in the drop down box, you will see the answer (below):

Enter your question:

Is 9.65m the maximum w X

Expand All

**Is 9.65m the maximum working height for Trade King 730 Tower?**

Yes.
